

To whom it may concern,

The 22nd Illinois House District represents a unique landscape as home to not just Midway Airport, but the many communities and neighborhoods that surround it. The diverse group of residents and families who live and work near Midway make up a community with specific needs and desires. In fact, many of us have been impacted by the problematic soundproof windows installed in our homes to keep us safe from airport noise, but have only caused us more trouble. It's critical the 22nd District remains intact as we continue building a Midway community that is safe, strong and looking to the future.

Sincerely,

Pamela Zidarich

Member of the Residential Sound Insulation Advisory Committee.
